

Alecto Forensics

# Forensic Ecology Training

## Forensic Ecology for the Legal Profession

### Course

- One-day foundation learning and skills development course run at Alecto's laboratory and training facility in Watchfield and delivered by accredited instructors
- Designed for members of the legal profession and other related professionals (also appropriate for participants with no prior experience in the forensic ecology disciplines)
- Introduces participants to a broad range of ecological evidence types

### Structure

- The course is presented through lectures, interactive classroom discussions, and practical exercises
- Participants will receive a comprehensive folio of training materials

### Content

- Presents an overview of the forensic ecology disciplines and appropriate case studies to demonstrate what they are, how they are interpreted, and how they can be utilised within a criminal investigation
- Provides an understanding of how ecological evidence types may be affected in varying scenarios and how these may impact a criminal investigation
- Challenges participants to consider the strategic value of these novel evidence types and how they can be successfully integrated in a criminal investigation and presented in court

### Outcome

- Understand how ecological evidence types are interpreted and presented within a criminal investigation
- Consider the strategic importance of a broad range of ecological evidence types
