

Forensic Training

Blood Pattern Analysis

Course

- Intensive course run at Alecto's laboratory and training facility in Watchfield and delivered by qualified instructors
- Designed for crime scene investigators, managers and other related police professionals
- Provides a comprehensive overview of blood stain pattern analysis and its contribution to criminal investigations

Structure

- A pre-course briefing pack will be provided
- The course is presented through lectures, interactive classroom discussions, and indoor and outdoor practical exercises
- Participants will receive a comprehensive folio of training materials
- The course includes a number of assessed activities including a short written examination
- Certificates of satisfactory completion will be awarded

Content

- Considers blood stain pattern analytical techniques, teaches the correct descriptive terminology, discusses how they are created, and how they can be interpreted within the context of a case
- Understand blood stain patterns associated with scenes, clothing, suspects and victims
- Undertake the creation of blood stain patterns in order to evaluate a proposed set of circumstances and consider the intelligence provided
- Recognise and make an initial assessment of blood stain patterns at a crime scene
- This course is designed as CPD and is not designed to enable participants to replace a reporting scientist

Outcome

- Identify and record individual blood stains and patterns
- Understand the processes around how blood stain patterns are formed and produced
- Assist in interpreting blood stain patterns at scenes
